Lakeland's Little Learners

FEBRUARY 2025

Hello February!

Hello Families, I hope you have all enjoyed your start to the new year! January has flown by and I can only imagine what that means for the rest of the year. We've had a nice month getting back into our school routine after the holidays. It's been fun watching the class exploring and building in the snow. The class is looking forward to some warmer days this month, so that we can be outside more often. Continue to send hats, gloves, and boots so students can stay warm when outside on the playground.

Thank you and have a great February!

Coming Up...

Air Rockets

We'll be using forced air to launch a paper rocket. With simple items, such as a water bottle and straws, we'll be experimenting with the best angle to launch our rocket and discussing how gravity can effect it's flight.

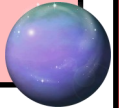

You're Out Of This World

Students will have the opportunity to create a fun and creative space themed valentines card. We'll be sharing these cards with our classmates to spread kindness and celebrate friendship with one another. We'll also be learning about what it means to be a friend.

REMINDERS...

- Continue to send warm weather outerwear
- Contact LLL the pay period prior to any schedule changes. If you need care during the no-school days, it is recommended to contact LLL at least two weeks prior to adjust your scheduled hours.
- Spring Break is coming up on March 24-28th

Creating Connection

Venus is Shining Bright In February

In February 2025, the most prominent space observation you can make at home is the planet Venus, which will be visible in the west-southwest sky shortly after sunset, shining exceptionally bright throughout the month; you can even use Venus as a guide to locate Saturn nearby with binoculars or a telescope if sky conditions are good. Take time with your child(ren) to look to the sky to identify these remarkable sightings! For a fun educational video and tips, visit <https://science.nasa.gov/solar-system/skywatching/whats-up-february-2025-skywatching-tips-from-nasa/>

Special Dates

- ♦ February 7 - Elegant Farmer Fundraiser Pick Up
- ♦ February 13 - EASD No School, 4K-5th Only
- ♦ February 14 - Happy Valentine's Day!
- EASD No School 
- ♦ February 17 - EASD No School Day
- ♦ March 7 - EASD No School Day

Last month...

During the month of January, we took time to learn more about snowflakes, ice, and arctic animals. We cut, colored, and designed snowflakes. The group loved learning about how all snowflakes are different (just like them!) and how their shape forms. We read several books and watched videos about arctic animals. We learned about why and how they survive in the cold temperatures. The class loved getting hands on interactive experiences with real ice and snow.
