

Lakeland's Little Learners 2.75 Room News July 2024

Last Month

Along with getting to know one another and our classroom routines, we have been strengthening our fine motor skills by exploring different art materials. The older two-year-olds have enjoyed painting pictures with watercolors, finger painting and also gluing shapes and sun rays.

This Month

The first week of July, we will be celebrating the 4th of July by coloring and gluing to create red, white and blue inspired art projects. Then we will shift our focus to a unit on water life. We will also learn, explore and read about plants and animals that live in the water.

Parent Connection

Children learn and engage through sensory play. You can make mud pies with your child in your own back yard! If you are not feeling quite that adventurous, try sand or water play. Be creative and have fun!

Reminders

Please remember to wash your child hands upon arrival. Also, please be sure to mark your child's belongings with their first and last name. Lastly, apply sunscreen to your child before bringing him or her to school. For safety reasons, please send your child in closed toe shoes. It is very hard to run on the playground in sandals and flip flops.

Mark Your Calendar

Monday July 4th, LLL Closed - Happy Fourth of July!

Thank you,

Ms. Shandana
